

Newsletter - April 2019

**FINAL CONFERENCE AND MEETING  
OF THE PROJECT  
FERRARA, PALAZZO ROVERELLA-  
3RD AND 4TH APRIL 2019**

The final conference of the CitiEnGov Project was held in Ferrara on 3 and 4 April 2019. The event involved all the 10 partners from 7 different countries in Central Europe, Public authorities, local and non-local stakeholders, technicians, universities.

**The final conference was focused on 4 key moments:**

**Focus 1 - Energy data and buildings:**

**- Project results in the city of Ferrara; Programma Elise (European Location Interoperability Solution for e-Government); Tackling energy - related data interoperability from the CityGML Energy ADE point of view; market advantages in the application of rating systems in the construction supply chain; Energy Management in district heating in Bydgoszcz**

**Focus 2 - Public administration as urban and energy planner:**

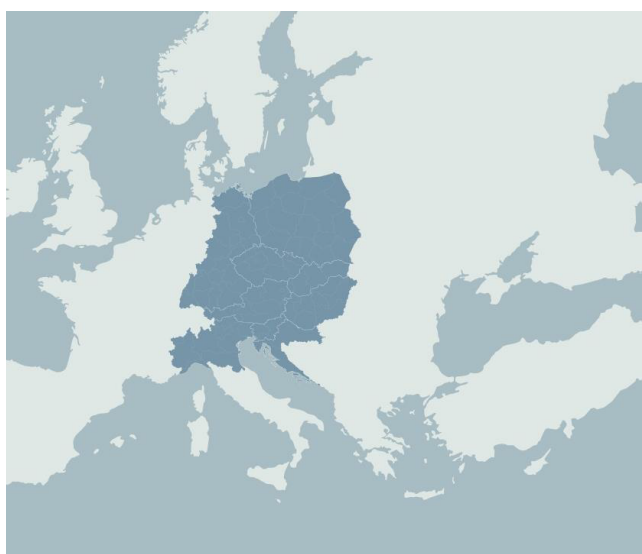

**- Strategies and mission statement of Municipality of Weiz (Eco Incentive Programme); Smart City transition for Urban Planning in Bolzano and Trento; the impact of Climate Change: Vulnerability in Reggio Emilia; Adaptation and Mitigation planning at urban level in Central Veneto Cities; Smart City Dashboard to manage municipal big data; Geospatial Data & 3D Building Models to boost Energy Efficiency in Building**

**Focus 3 - Awareness raising on energy efficiency and use of renewable sources:**

**- Energy efficiency in SMEs; Low Carbon public building - targets and Challenges up to 2050; Research strategies towards technological development and integration; Performing Innovation (building capacities and raising awareness on energy efficiency: experiences from innovation performing)**

## Focus 4 - Sustainable public lighting systems and mobility solutions:

- Financial and technical Sustainability Aspect of Green public lighting in the city of Split; Experiences of ESMARTcity project; Innovative Lighting Solutions and Financing according to AESS Modena; Implementation of Dynamic Lighting Pilot System in Town of Cakovec.

## OVERVIEW ON THE RESULTS

During the final meeting were also presented the results of the project in the 7 countries involved:

- 9 new Energy Units at local public administrations;
- online tools for energy data management in 4 languages;
- 5 study visits with a total of 110 participants;
- 8 new PAESCs;
- 9 new SEAPs;
- 9 energy plans;
- 3 pilot projects;
- 3 new service centers and one-stop shops for energy;
- a new public lighting system for the city of Split.

**The event was a good success, seeing the participation of various representatives of local and international institutions, public administrations and all the actors involved in this 3 years project.**

**During the event, we also took the opportunity to reward the most virtuous citizen of the Eco-citizens programme that involved 30 families in Ferrara (in addition to 10 German and 10 Hungarians). The program included the realization of an initial energetic diagnosis and then advices, solutions and good practices to save energy and reduce costs in the bill. After one years a second audit have been done to check if the energy solutions have been applied. At the end of the one-year programme, families saved energy for an average of 5%.**

**The Project Manager - Chiara Franceschini - and the Sole Administrator of Sipro - Paolo Orsatti - highlighted how important and profitable have been the collaboration between all the partners and the actors involved in achieving the objectives set.**
