

SMERF Catalogue

Catalogue of best practices and success stories regarding SMERF

The SMERF project presents Catalogue of Best Practices and Success Stories, a comprehensive catalogue aimed at fostering SME readiness for the future. This catalogue is a result of collaborative research across partner regions, which focuses on four pillars: innovation culture, digital manufacturing, open innovation and sharing economy, and green & circular economy and sustainability.

By showcasing 16 exemplary practices, from regionally available case studies to economic success stories, this repository will further serve as a valuable resource for the upcoming SMERF webinars and the Inspiration Knowledge Base. Each selected best practice in the form of video interview offers a snapshot into the innovative and sustainable approaches adopted by SMEs across Europe, highlighting different benefits that derive from participation in SMERF project.

This catalogue not only underscores SMERF's commitment to enhancing SME competitiveness but also fosters a culture of knowledge sharing and collaboration across Europe. It stands as a cornerstone for further educational activities within the SMERF project, contributing significantly to its extensive goal of preparing SMEs for future challenges and opportunities.
